

Sirs, While some are apposed to competition, I feel it is one of the hallmarks of a free society. If XM radio were not competitive in the marketplace, it would not exist. The Traffic and weather channel(s) not only provide a valuable service. They help keep commerce moving while I make my deliveries in Dallas/Ft. Worth in my 18-Wheeler. If AM/FM did the job, I would not PAY for XM. Your proposed rules concerning limiting satellite radio content are only the the powerful (Clear Channel) wanting no competition.
